

GRASS FED

Don Filardi's 8-acre farm has been in the family since 1914. It was primarily a dairy farm until five years ago when Don began raising his family's sheep. They are pasture fed, with a supplement of alfalfa from a feed store in Petaluma. The sheep are sheared in June; the wool is sent to Yolo Wool Mill and comes back as yarn, batting, and roving.

Red Hill Farm
29 September 2000
Petaluma, CA

(Llamas like Mo are used to guard the flock against wild dogs and coyotes)

Sussex, Dorset and Friesian ewes

(These lambs are harvested at 70 days)

STEP 1:

Printing Posters

- Downloaded your files from the website. Put them on a thumbdrive and head to your nearest FedEx Office Location.
- Most FedEx locations will have a 3 Foot Wide (aka 36") Black and White Printer, which is most often used for printing architectural plans. Call ahead to make sure your location has one and ask if they are able to stock it with recycled paper.
- It generally costs \$.75 a square foot for the B&W wide format printer. Make sure to ask for the thinnest paper possible.
- Print costs range from:
 - 1'-2' wide prints = \$2-\$4
 - 3' Foot wide prints = \$7-\$9
 - 6' wide double prints = \$27-\$36

STEP 2: Poster Treatment

SUPPLY LIST:

- All purpose, water-based, fast drying acrylic paint
- Foam Brushes (an assortment of sizes are best for diverse brush strokes)
- Recycled Containers (yogurt cups work great)

INSTRUCTIONS:

- Mix approximately 1 part paint to 8 parts water in containers
- Apply with brushes sparingly.
- Avoid painting over the black ink on the poster, as much as possible.
- Allow at least 1 hour for drying.

STEP 2:

Preparing Mixture for Applying to a surface

SUPPLY LIST:

- A large saucepan
- 4 cups of water
- 1 cup of white flour
- A whisk
- 1 large container with lid
- Measuring cup

INSTRUCTIONS:

- Combine 1 cup white flour to 4 cups of water in large saucepan on medium heat
- Whisk continuously to avoid lumps
- Bring to a premature boil
- Mixture should be the thickness of a thin glue, it will thicken slightly once it cools
- Once cooled, pour into container with lid.
- Mixture will last 2 days

STEP 3:

Poster Application

SUPPLY LIST:

Brush (Roller brush is easiest)
Homemade Wheatpaste

INSTRUCTIONS:

- Saturate brush with wheatpaste
- Brush the surface where the poster is going to be glued to
- Place poster onto surface
- Brush wheatpaste over poster
- Get air bubbles out from under the poster by brushing from center out

STEP 4: Share it!

Snap a photo of your street art posters and share it with The Lexicon community!
