What can we do to fight factory farms? (Plenty of things...)

- 1.) **Hold hog factory owners and investors accountable at the local level** and build grassroots support for what we're doing through:
 - Meetings, public actions and protests
 - Petitions
 - Radio Ads
 - Flyers and phone calls
 - Newspaper stories, ads and letters to the editor
 - Nuisance lawsuits (tied in to organizing campaigns)
 - And other means --
 - ✓ Don't sell land to hog factories.
 - ✓ Don't take their manure.
 - ✓ Don't give them tax breaks, or discounted water and electric rates
 - ✓ Charge them for tearing up our roads and bridges.
 - ✓ Ask your county supervisors, city councils and other public bodies to pass local health ordinances, resolutions, and the Master Matrix.
 - ✓ Use creative strategies that will make it more difficult and more costly for factory farms to operate.
- 2.) **Hold state legislators accountable** by demanding:
 - Local control
 - Clean air standards
 - Stiffer fines and penalties for environmental violations
 - Tougher permitting requirements
 - A statewide moratorium on factory farm construction/expansion
- 3.) **Hold the Iowa Department of Natural Resources accountable** for protecting the environment (air and water), enforcing the law, and cracking down on factory farm polluters.
- 4.) **Don't stop:**
 - Speaking out, being vocal and fighting back against factory farms.
 - Exposing the truth and confronting injustices.
 - Organizing with your friends and neighbors to hold hog factories and public officials accountable.
